

Green your Business with Electric Vehicle Charging

Support your staff by offering Electric Vehicle charging.

Workplace charging doesn't have to be expensive and it offers many benefits to employers, employees, and (of course) the environment. Installing EV charging stations at your place of business can;

Demonstrate environmental leadership

Help employees save money

Help attract high-quality employees

Increase overall employee job satisfaction

Ontario Businesses can be Reimbursed 80% of their Electric Vehicle Charger Installation

The government of Ontario has announced the Workplace Electric Vehicle Incentive Program (WEVCIP) providing substantial rebates for workplaces, building owners and building managers to install electric vehicle charging stations for their employees. The program will reimburse 80% of the equipment and installation, up to \$7,500 per station.

WEVCI Program

The Workplace Electric Vehicle Incentive Program begins January 2018, offering huge incentives for workplace installations.

Reimburse up to 80 per cent of the equipment and installation, up to \$7,500 per station

Open to legal entities with a Canada Revenue Agency (CRA) and at least 10 full time employees

Charging stations must be in operation for 5 years from the date that they are put into service

Charging stations must be available for use year-round by employees
